

MICR SPECIFICATIONS REQUEST

In order to process your order, we must have an actual sample of your check with the correct MICR line or this MICR specification sheet filled out. Starter checks, counter checks, deposit slips, etc., are not accepted because they do not reflect the appropriate positioning of the numbering.

Please help us do things right the first time around. Faxing often causes MICR numbers to appear distorted - 7's look like 1's, 8's look like 5's, etc. If you would kindly use this enlarged MICR spec sheet when faxing orders, we will work hard to keep you happy.

Upon request we would be pleased to provide you with a MICR gauge template.

Your Company Name:

Your Purchase Order No.:

Our Fax Number is:
